Courses of Study for Pennsylvania State Normal Schools

[As finally revised and adopted at a meeting of Normal School Principals held at Harrisburg, December 30, 1910.]

Note—This course is based on the "unit" plan as proposed by The Carnegie Foundation.

"A unit" represents a year's study in any subject in a secondary school constituting approximately a quarter of a full year's work.

(This statement is designed to afford a standard of measurement for the work done in a secondary school. It takes the four-year high school course as a basis and assumes that the length of the school year is from thirty-six to forty weeks, that a period is from forty to sixty minutes in length and that the study is pursued for four or five periods a week; but, under ordinary circumstances, a satisfactory year's work in any subject can not be accomplished in less than one hundred and twenty sixty-minute hours or their equivalent. Schools organized on a different basis can nevertheless estimate their work in terms of this unit.)

Students admitted to the First Year shall have a fair knowledge of Arithmetic, Reading, Orthography, Penmanship, United States History, Geography, Grammar, Physiology, Civics, and the Elements of Algebra to Quadratics. Test by Faculty.

FIRST YEAR

	No. of 60 minute periods	or No. of 45 minute periods
Algebra, ...	120	160
Latin, ...	120	160
School Management and School Law,.	120	160

	No. of 60 minute periods	or No. of 45 minute periods
Orthography, ...	30	40

Drawing, ...	40	50
Manual Training or Domestic Science,	40	50
Physical Training,.	60	80
		1110

In the fourth year Ethics, Logic and Sociology may be substituted for Virgil, French, or German. Philosophy of Education, or Surveying may be substituted for Ethics, Logic, or Sociology.

SUPPLEMENTARY COURSE

(In addition to the Regular Course)

Leading to the Degree of Bachelor of Pedagogics.

Philosophy of Education; Advanced Psychology.

Discussion of Educational Questions; School Supervision, including School Law; Devices for Teaching; Educational Theories, etc.

School Apparatus and Appliances; Description, Use, and Preparation.

Leading to the Degree of Master of Pedagogics.

Two years' teaching after graduation in the Regular Course.

Professional Reading, with abstracts; History of Education in the United States (Boone); European Schools (Klemm); Systems of Education (Parsons).

Sanitary Science; School Architecture, etc.

Thesis.

A full equivalent will be accepted for any of the text-books named above. The courses in reading and classics for all the courses shall be determined by the Board of Principals at their annual meeting, and shall be the same for all normal schools.

Conditions For Admission and Rules For Final Examinations

1. Properly certified graduates of approved Pennsylvania high schools of the first grade and city high schools, as listed by the Department of Public Instruction, shall be admitted to the third year of the Four Years' Course of the State Normal Schools without examination, and be conditioned in the branches that have not been satisfactorily completed by such students.

2. Properly certified graduates of approved Pennsylvania high schools of the second grade shall be admitted to the second year of the Four Years' Course of the State Normal Schools without examination, and be conditioned in the branches that have not been satisfactorily completed by such students.

3. Properly certified graduates of approved Pennsylvania high schools of the third grade shall be admitted to the first year of the Four Years' Course of the State Normal Schools without examination, and be conditioned in the branches that have not been satisfactorily completed by such students.

4. A person who desires to be admitted to the second or the third year without having previously attended an accredited high school, must have a certificate of a commissioned Superintendent of Schools, showing that he has pursued the branches of the first year or the first and second years, with his standing in those branches, or must pass a satisfactory examination by the Faculty in said branches, or be conditioned in them. But the studies in which one is conditioned under this rule or any one of the rules above, shall not foot up more than three hundred and twenty weeks.

5. If the Faculty of any State Normal School or the State Board of Examiners decide that a person is not prepared to pass an examination by the State Board, he shall not be admitted to the same examinations at any other State Normal School during the same school year.

6. If a person who has completed the State Board examinations required for admission to the classes of any year at any State Normal School desires to enter another Normal School, the Principal of the school at which the examination was held shall send the proper certificate to the Principal of the school which the person desires to attend. Except for the reason here stated, no certificate setting forth the passing of any studies at a State Normal School shall be issued.

7. Candidates for graduation shall have the opportunity of being examined in any higher branches, including vocal and instrumental music and double entry bookkeeping; and all studies completed by them shall be named in their certificate. Persons who have been graduated may be examined at any State examination in any higher branches, and the Secretary of the Board of Examiners shall certify on the back of their diplomas as to the passing of the branches completed at said examination. No certificate or diploma valid for teaching except the one regularly issued by the State board of Examiners to regular graduates shall be issued by any State Normal School or any person connected with any such school.

8. A certificate setting forth the proficiency of all applicants in all the studies in which they desire to be examined by the State Board of Examiners shall be prepared and signed by the Faculty and presented to the Board. Studies that have been completed at a high school shall be designated by the words "high school" or the initials "H. S." A separate list of each class shall be prepared for the use of each examiner together with a separate list of students conditioned in any branch, with the branches in which they were conditioned and the grades shall be indicated in every list where substitution is made or extra branches are taken. These lists shall be ready for the State Board before the examination begins.

9. No State examination shall be given to any student on part of a year's work unless the study is completed, but (except in the last year's examination) a student may be conditioned by the State Board of Examiners in not more than two subjects, covering not more than one period of work for a year. Accurate records of these conditions shall be promptly sent to the Superintendent of Public Instruction and the fact that the students thus conditioned have taken up such subjects and passed them by the faculty shall be certified in writing to the State Board of Examiners before such students are admitted to another State Examination.

10. Within fifteen days after the examination by the State Board at any Normal School, the Principal of the school shall send to the Department of Public Instruction a complete list of all who have taken advanced branches, together with a list of these branches, also a list of those to whom diplomas and certificates were granted, and a list of those who passed the State examination in any year, naming the year.

11. Graduates of State Normal Schools in the regular course, and graduates of colleges approved by the College and University Council, who shall satisfactorily pass the Faculty and State examinations in the course required therefor, shall receive the degree of Bachelor of Pedagogics. And Bachelors of Pedagogics who have, after receiving such degrees, taught successfully for two years, and passed the Faculty and State examinations in the course required therefor, shall receive the degree of Master of Pedagogics.

12. Residence for the last two years shall be required of all students, except in the case of graduates of Four Years' Courses in colleges approved by the College and University Council, who may be graduated after one year's residence.

CERTIFICATES AND DIPLOMAS

A student who is graduated in the Regular or the Supplementary Course will receive a certificate, in which will be named the branches of the course, and which will confer upon

him the right to teach in the public schools of the State two years without examination.

A graduate in the Regular Course who has continued his studies for two years, and has practiced his profession during two full annual terms in the common schools of the State, will receive, upon presenting to the Faculty and Board of Examiners a certificate of good moral character and skill in the Art of Teaching from the board or boards of directors by whom he was employed, countersigned by the proper Superintendent of Schools, a second diploma or certificate, which authorizes him to teach in the public schools of the State without examination. **Applications for the second diploma must be filed with the Principal before the meeting of the State Board of Examiners in June.**

A graduate in the Regular Course who completes the first year in the Supplementary Course may receive the degree of **Bachelor of Pedagogics (B. Pd.).** After two years' successful teaching and the completion of the second year's course he may receive the degree of **Master of Pedagogics (M. Pd.).**

STATE CERTIFICATES

Practical teachers may obtain **Teachers' State Certificates** on the following conditions:

1. All applicants must be twenty-one years of age and must have taught in the common schools of the State during three full annual terms.

2. They must present certificates in regard to moral character and skill in practical teaching, similar to those presented by the regular graduates and signed by the same school officers.

3. They must be examined in all the branches of either the Regular or Supplementary Course, by the Faculty and Board of Examiners, at the time of the annual examination at the school where application is made.

4. A Thesis on some educational subject will be required as part of the examination.

The certificates granted in accordance with these conditions will enumerate the branches of study of the course in which the holder was found proficient.

All diplomas and certificates are authorized and furnished by the State, and exempt those who hold them from any further examination by superintendents or other officials acting under the provisions of our common school laws.

EXAMINATION FOR GRADUATION

No one can graduate from a Pennsylvania State Normal School who has not been in attendance for at least one school year.

Candidates for graduation are examined by the Faculty, and, if found qualified, are recommended to the Board of Examiners .

The State Superintendent, or his deputy, shall be President of the Board, and in conjunction with two principals of Normal Schools, and six County, City, Borough, or Township Superintendents, shall constitute the Board of Examiners.

At the examination for graduation, a paper stating that the candidates have completed the course of study for normal schools, have taught the required time in the Model School, and have been examined and approved by the Faculty shall be presented by the Principal to the Board of Examiners.

The Examiners test the knowledge of the candidates upon all branches of study in the course in which they are examined, special attention being given to the Science and Art of Teaching.

Departments of Study

PEDAGOGICS

A successful normal school must make ample provision for the academic and professional training of its students. The teacher must have cultured powers and a well-informed mind. Whatever half-truths may lie in the principles advanced by Jacotot, it is certain that a person cannot teach what he does not understand. Without that co-ordinated mental development, which should be the only basis for all promotion or advancement, the teacher will be unable to think, to originate, to influence, to control. In no other way can a teacher so soon gain the respect of his pupils as by convincing them that his scholarship is of a high order of excellence. The Normal School, therefore, must make full provision for the scholastic training of its students.

But thorough knowledge of the subjects which we would teach is only one of the essential qualifications of a teacher thoroughly trained and fitted for the work. Professional preparation and training is demanded of all who can reasonably expect to succeed in the work of transforming the child into the man by developing all the powers of body and of mind. The day has gone by when every person who is conscious of his inability in other lines of work can hope to be counted competent to train the ignorance and weakness of infancy into all the virtue and power and wisdom of mature years. The true teacher must **know** his work—must be able to give a direct answer to his soul's question, "What is this which I do?" The laws of culture and instruction, the relation of the different branches of knowledge to each other and to the mind, the methods by which the human powers may be called into being and trained, must all be understood and appreciated by the person who would attempt to bring up the feeblest of creatures

THE MAIN BUILDING

MODEL SCHOOL

into a representative and interpreter of the Divine. We endeavor to lay broad foundations for the pedagogical training of our students.

The theory of teaching, as presented to the students of the Regular Course, embraces the following subjects: **School Economy, Principles of Education, Methods of Teaching,** and **History of Education.**

During the Junior year elementary Pedagogics and School Economy are completed, and some work in Primary Methods begun. The members of the Middle class direct their attention to the study of Psychology, and considerable observation and practice in the Model School. Methods of Teaching, and the History of Education are studied by the Seniors as aids in the development of true educational ideals. The art of teaching is learned by **practice,** governed by the **principles** of the science and the **observation** of correct methods. It is the purpose of the instructors in the Normal School to make their own teaching in each department a practical illustration of the proper methods to be pursued. Students receive instruction in the elements of Pedagogics from the time of their entrance into the school.

For information as to the educational purposes of philosophical pedagogy we must turn to the study of **Ethics.** The ethical culture of the will is the highest purpose of education. That is true moral training which can make the ideas of the right and the good the proper objects of the will, and lead the personality to self-development, thus forming character. The associated branch, **Logic,** cannot fail to be of great assistance to anyone who desires to sketch a logical purpose—an ideal which the educator will strive to realize in the pupil. **Ethics** and **Logic,** with **English History,** may be substituted for the Latin of the Senior year.

MODEL SCHOOL

This **distinctive feature** of the State Normal Schools is with us a true town school, under the skillful direction of an efficient Superintendent and his assistants. It is the purpose of the offi-

cers of the school, in conjunction with the directors, to make this in every respect a **Model School.** The spirit of the kindergarten pervades the whole, and much of the actual work of the system of Frœbel is utilized. The members of the Senior class practice in the school during the entire year, each student teaching one class daily. The classes are changed when necessary, and the Seniors thus have an opportunity to give instruction in the different branches and grades. They are often placed in charge of several grades at one time, teaching one class while other grades are preparing lessons or engaged upon "busy work." The various classes in Form and Drawing, and Singing are placed in charge of the Seniors under the supervision of the teachers of Music and Form-study. Plans for each day's work are prepared by the student-teachers and submitted to the Superintendent.

A systematic course of **observation lessons** on the work done in the model school is arranged for the Junior class by the Superintendent. These lessons are carefully graded, and the students are taught **what** to observe and **how to observe.** We aim to make skillful teachers of our students.

The term of forty-two weeks' teaching under the direction of those who are competent to point out defects and suggest their remedies is, ordinarily, worth more to teachers than many years of experience when they are left to discover their own faults and find their own way out of them. This is really the most valuable work in the course. The members of the Senior class observe and teach in the public schools of Slippery Rock, which constitute the Model School of this institution. Seniors meet the Superintendent of the practice school collectively twice each week for general instruction in Methods and School Management and individually meet him daily for special instruction adapted to their needs. This experience in public schools of high reputation and efficiency is an excellent preparation for the practical side of teaching, and gives the graduates of the school an advantage which cannot well be overestimated.

The practice-school as organized at present consists of three departments:—a kindergarten; a primary and grammar school

of eight yearly grades; and a high school having a complete three-years' course. Every effort is made to make this an efficient and practical school.

The most important function of a Normal School is to discover, to inspire, and to train the teacher, and to fit him for his place in the public schools. To the trained teacher, Slippery Rock Normal offers unexcelled opportunities for acquiring the professional knowledge and technical skill indispensable to the best teaching. In its course of study are included all the necessary elements in the training of teachers: educational theory; thorough study of the subject-matter in the common school curriculum; observation of model teaching; and practice in teaching under expert supervision.

LANGUAGE

Grammar.—Much attention is given to the study of grammar, and the work is made as practical as possible. The aim is to give the student the essential facts of the subject, and to enable him to express these facts in as simple a way as is consistent with accuracy. The student is trained in the use of his mother tongue by having him use it. The plan is to require nice discrimination from the first, and to make the power to draw nice distinctions one of the chief disciplines of the subject. Due attention is paid to parsing, analysis, and structural forms of the language.

Rhetoric.—The work in Rhetoric and Composition is adapted to the needs of students who are learning to express themselves with the pen. The understanding of the principles of the various kinds of composition, the appreciation of beauty of expression, and the acquisition of a good clear style constitute the natural aim of the student in this branch. The instruction is such as will show a young writer how to present what he has to say in the best English within his reach, and in a form adapted to his purpose.

Literature.—The study of Literature includes a critical examination of the masterpieces of English and American writers, in order to cultivate a love for the beautiful and true through the study and appreciation of the thoughts of certain great authors. A systematic study of the history of literature is undertaken in less degree. Among the forms of literature receiving attention are the oration, essay, ballad, sonnet, ode, short story, and drama. The Senior class covers the work prescribed for college entrance, including the study and interpretation of at least five classics.

Latin.—It is the aim of our instruction to see that the study of Latin does not become a barren waste of time and energy, but a means of securing that broad culture which must ever remain the mark of the educated man. The student, in some degree at least, becomes a partaker of the benefits which flow from the study of the life of a great people as revealed in its literature and art. The Junior work consists in the grounding of the student in Latin forms and inflections, and in the general principles of the syntax of the language. The text in use during the three terms of the year is Collar and Daniell's First Year Latin. The Roman pronunciation is used, and most of the sentences are read by the instructor as a guide to the pupils in pronunciation. Constant reviews are given. Upon the completion of this course, the student is thoroughly prepared to study Cæsar intelligently. Four books of Cæsar are read during the Middle year. One lesson each week is devoted to prose composition, the vocabulary used being chiefly from Cæsar. The aim is to acquire the power to use readily the more common constructions. Frequent written tests in Latin construction are given. Part of the advance lesson is used for sight reading. During the Senior year, three or four of Cicero's orations are read. Frequent exercises are given in which the teacher reads the Latin and the students translate from hearing. Special attention is given to the critical study of conditional sentences and subjunctives. Three books of Virgil are read. Careful attention is given to all mythological references, using as authorities Gayley's **Classic Myths** and Guerber's **Myths of Greece and Rome.** The characteristic rythm of the Aeneid is observed in the reading, and short sentences are committed to memory. Constant comparisons are made between the forms and constructions employed in poetry and those in prose.

Greek.—Greek may be substituted for Latin or Chemistry in the Middle year; and for the Latin or Mathematics of the Senior year. The course covers the usual ground of preparation for entrance into college. The texts are White's **First Greek Book,** four books of Xenophon's **Anabasis,** and three books of Homer's **Iliad.**

French. — French may be substituted for Latin or Chemistry throughout the entire course; or for Solid Geometry, Trigonometry, and Surveying in the Senior year. During the first year of study careful drill in the pronunciation of the language is given, and the students become familiar with the rudiments of the grammar. Short selections in poetry and prose are memorized. Conversation, and dictation exercises are used as aids in securing command of the language. The reading comprises Guerber's **Contes et Légendes,** and Malot's **Sans famille.** During the second year, advanced work in grammar and composition is given. The class reads six hundred pages of standard literature. Sight reading, composition, and the making of résumés of the texts read are continued throughout the course. Among the works read in

the second year are: Halévy's **L'Abbé Constantin**, Labiche's **Le voyage de M. Perrichon**, Sand's **La mare au Diable.** French History is studied one day each week. In the third year may be read, Vigny's **Le Cachet Rouge**, Lamartine's **Jeanne d'Arc**, Sandeau's **Mademoiselle de la Seiglière**, Lesage's **Gil Blas**, Balzac's **Le Curé de Tours**, Daudet's **La Belle Nivernaise**, Hugo's **La Chute**, and selections from Racine, Corneille, and Molière.

German.—This language may be substituted for Latin or Chemistry throughout the entire course; or for higher Mathematics in the Senior year. The text employed during the first two terms of the Middle year is Becker's **Elements in German.** In the last term, Storm's **Immensee** is read with Joynes-Meissner Grammar as an aid in the work. The general scheme consists in the writing of easy sentences in German from English dictation; translations made from hearing German read; frequent tests on pronunciation; questions and answers in German, based upon lesson read; and the committing to memory of short idiomatic expressions in German. During the Senior year, one lesson each week is devoted to Joynes-Meissner's grammar of the language. Four or five stories in standard German are read. The students tell the story of the day's lesson in German; short selections from new German are read and the students translate; questions and answers in German on the text; compositions on subjects assigned by the teacher. Among the texts read are: Zschokke's **Der Zerbrochene Krug**; Seidel's **Leberecht Hühnchen**; Hillern's **Höher als die Kirche**; Hauff's **Das kalte Herz**; Baumbach's **Die Nonna**; Heyse's **Neils mit der offenen Hand**; and such plays as Benedix's **Der Prozess**, and Schiller's **Wilhelm Tell.**

Orthography.—The subject of Orthography includes a careful study of the spelling, enunciation, pronunciation, meaning, and use of words. Constant drills in spelling and defining are given to the students, and the importance of correct spelling and understanding of words is emphasized. Word analysis, including the literal meaning of the prefixes, suffixes, and roots which compose our most familiar derived words, receives proper attention. Diacritical marks and accents are studied so that proficiency in the use of the dictionary may be gained.

Reading.—The objects to be attained in the work of reading are the getting of the thought from the printed page, and the gaining of the power of vocal expression. The teacher endeavors to make the reading lesson a thinking lesson, in which the mental grasp of thought-getting is given special prominence. Exercises are given in comprehensive sight reading, from magazines and periodicals, together with the proper rendition of hymns and selections from the Bible. A judicious use is made of phonics; and drills in emphasis, inflection, and expression are introduced. The student must first be a good reader before he can be an artist in expression.

MATHEMATICS

The primal condition of the existence of mathematical science as such is that the first principles shall be so clear and so perfectly defined that no one can mistake them. In order that the student may be led to see the order, harmony, and beauty of real mathematical science, the fundamental principles must be exhibited in a clear and unmistakable light. It is the purpose, therefore, of the teachers in mathematics to see that the students grasp thoroughly the science of each subject. The fundamental principles are developed inductively through the solution of particular problems and cases which gradually increase in generality until the mind grasps the greater truth. Principles are emphasized in all the subjects, for it is believed that no one who has not a thorough knowledege of primary principles and their relations can become a skilled mathematician.

Arithmetic.—The pupils are led by easy transition from the elementary forms of reasoning to pure mathematical demonstration. The mastery of the processes and principles is shown to be essential to any person who would be of use to himself or others in the actual business transactions of life, wherein results must be exact and computations quickly completed. The aim is to make the subject thoroughly practical. Among the topics to which attention is directed are: fractions —common and decimal—reason in simplifying; percentage—its uses in business transactions, short methods; longitude and time—standard time; ratio and proportion in relation to careful reasoning; advanced arithmetical computations. Special attention is given to exact, correct, and concise statements.

In the Senior year, a careful study is made of the principles underlying the teaching of the subject in the public schools. A comprehensive review of the principles and processes is made in order that additional power in computation may be gained. Broader, clearer, and more accurate knowledge of the subject is sought, and the power to analyze conditions cultivated. The subjects, square root, cube root, mensuration, progressions, interdependence of arithmetical principles, and the proper presentation of the various subjects to a class in the public schools are given much attention.

Algebra.—In order that Algebra may prove an interesting subject to the pupils, we try to present it according to an attractive method. Attention is given to algebraic processes, while the ideas which have been developed in the study of arithmetic are associated with those involved in algebra in such a way that no difficulty is experienced in passing from reasoning with definite numbers to reasoning with general numbers. We aim to show that a knowledge of the subject rests upon certain elementary principles. These are developed by means of questions leading the student to infer and apprehend clearly the truths presented. Clear and accurate statements follow, and then full proof

of the principles involved. Upon these foundation principles the whole subject is based, and frequent reference is made to them. The treatment of the equation is basic, and the student is made familiar with its fundamental principles so that rapid progress is made when consideration of the more abstract phases of algebra is undertaken.

Geometry.—Geometry is essentially a disciplinary study, and the amount of the benefit derived from its consideration will depend upon the independent thought expended upon it by the pupil. It is recorded of Euclid that, when Ptolemy asked whether there were no easier means of learning geometry than that given in his writings, he replied, "There is no royal road to Geometry." In our teaching of this subject the pupils are encouraged to search out their own authorities for verification. Pride in independent work is a most important factor in securing satisfactory results. Much attention is given to the original exercises, and the pupils are encouraged to make neat and accurate constructions in all work undertaken. Clearness of conception and exactness of expression are sought under all circumstances. Solid Geometry is studied by those who elect it, and is often taken by students who are able to carry an extra branch of study.

Classes in Analytical Geometry and in Differential and Integral Calculus are formed whenever there is a demand sufficient to warrant the organizing of such sections.

Trigonometry and Surveying.—This institution has recently purchased a fine Gurley transit, chains, pins, etc., and is now ready to offer superior advantages to any who wish to acquire a thorough knowledge of the surveyor's work. Our methods are not the antiquated forms in use in many schools, but the fresh and vigorous practice of the Coast Survey. Full instruction is given in the details of map-drawing, mechanical drawing, and construction.

NATURAL SCIENCE

Physiology.—In the study of this subject the foundation is laid in the general principles which underlie all life. This is accomplishel by comparison with the lower forms of the animal kingdom, and by the microscopic examination of the various structures and tissues of the body. The study of the facts of human physiology is made the basis of instruction in the principles which underlie the care of the body. Special prominence is given to the proper care of the health in relation to school life and work and to the best methods of teaching this important subject in the public schools.

Botany.—The course in Botany aims to awaken a natural interest in the various forms of plant life. The student is led to know plants as living things that do work and overcome obstacles. Whenever possible, the plant is studied rather than the text-book. Seedlings are grown and observed by each pupil, experiments are performed, and

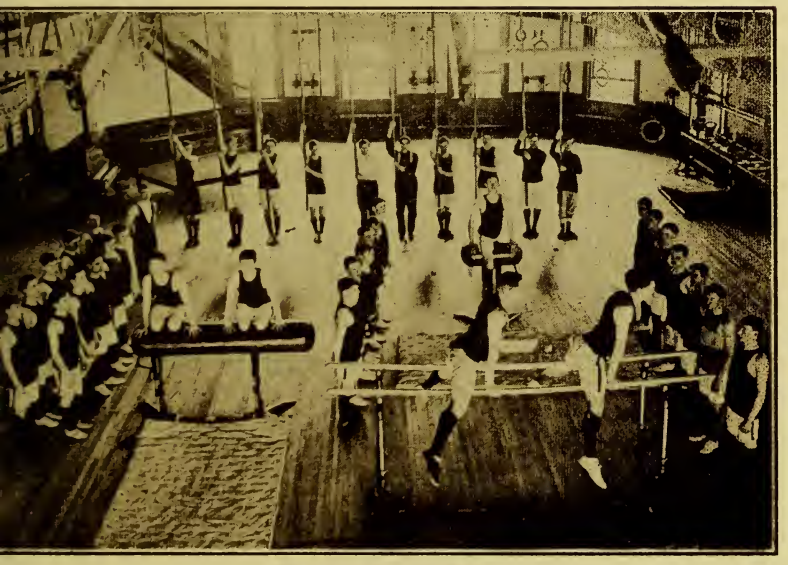
field work is done. The few plants that are collected and mounted by each pupil serve to work out a definite problem. In the class-room rare and curious plants, seaweeds, etc., are shown, and some work with the microscope is done. Many photographs, showing various conditions of plant-life, have been prepared by the instructor in charge and are used in the class-room work.

Zoölogy.—The subject of Zoölogy should bring the student into close contact with the animal forms of his environment. While studying the general principles which underlie all living forms, the aim is to lead the student to see for himself, in the animals with which he is familiar, the adaptations of habit and structure to surroundings and mode of life. The development of a sympathetic appreciation of the beauty and harmony of nature as seen in the forms of the animal kingdom is the object sought. As a means of studying the life-history of animal forms, special attention is given to the development of insects, and the students are encouraged to collect and observe the habits of larvæ and trace their metamorphoses.

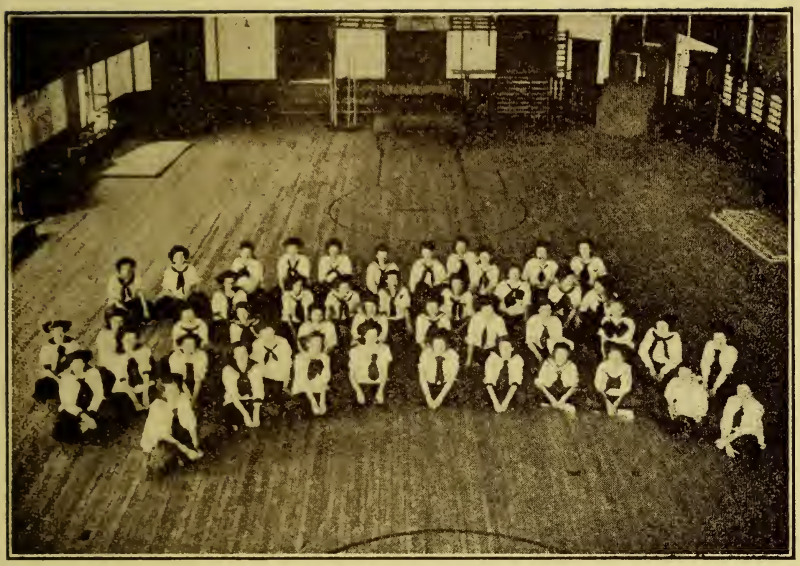
Chemistry.—In the teaching of this branch of science class-room work is combined with the work of the laboratory so that they are supplementary to each other. The various objects are studied first in the class-room, and the students are then assigned work in the laboratory which will serve to illustrate and fix the principles involved. The constant aim in the study of general Chemistry is to lay a broad foundation in the general principles of this science so that the student may afterward, if he so desires, proceed to special work. The opportunity is offered to take up a year or more of advanced work.

Geology.—In the study of Geology the aim is to familiarize the student with the ordinary rocks and rock-making minerals, so that he may recognize the more common forms. The agencies by which the earth has been brought to its present condition are studied, and, as far as possible, these are studied by the geological features of this locality. In the study of historical geology, special attention is given to the formations of the Carboniferous Age as illustrated by the coal and limestone beds in this portion of the State.

Astronomy.—The object of the study of this subject is not conceived to be that of rendering students expert astronomers, but rather to lead them to an appreciation of the beauty and harmony of the laws of nature as seen in the order and movements of the heavenly bodies. With this end in view, the student is given the general principles on which the science depends, and is taught to apply them in simple observations such as may be available to him without the equipment of an astronomical laboratory. The movements of the sun and moon, the causes and phenomena of eclipses, the relations of the bodies which compose the solar system, and the form and position of the principal constellations are subjects which receive special attention. Observations are made by means of a four-inch Paris refractor.



GYMNASIUM DRILL



GYMNASIUM

Physics.—The subject of Physics is studied from the practical rather than from the theoretical side. Sufficient of the theory is given to enable the students to deduce the laws from experiments, which are a constant accompaniment of the class-room work. The students are directed in the performance of many experiments, often with improvised apparatus, for the purpose of showing how the various principles may be used in the public schools. Special attention is given to the recent developments in electrical science, and the principal functions of the electric current are illustrated by actual measurements. Throughout the work, clearness of statement and scientific accuracy are required.

Nature Study.—In these days of advanced ideas, when the demand is growing stronger every year for concrete work in education, much stress is laid upon Nature Study as affording desired mental discipline. Much work is done in connection with botany, zoölogy, and the other natural sciences; and the Seniors are required to apply these lessons in the practice school. There the pupils are led to study the representatives of most of the larger groups of plants and animals found in the neighborhood. Pupils also learn about the various products of plants and animals that are used for food, clothing, implements ,building material, and medicine. The pupil is taught to find the meaning of each fact that comes under his observation. Thus the study of nature becomes a delightful recreation, and not a mere task. Under the direction of the Principal of the Normal School and the teachers of the natural sciences, special lessons in the best modern work in Nature Study are given to the members of the Senior class.

HISTORICAL SCIENCE

History of the United States.—In the intellectual development of the youth of America there can be no more helpful and important discipline than the study of the history of their own country—in its events, institutions, and social and industrial movements. The proper teaching of history stimulates the student to general research in subjects; it leads to a spirit of inquiry ,and develops a deeper love of country. The relation of cause and effect in events should be kept constantly in view. In this department, the work in the class-room is based upon text-books, supplemented by biographical incidents illustrating the characters of the makers of history. Special attention is paid to the political growth and industrial advancement of the United States. Great use is made of outlines, and students are recommended to read certain historical poems and novels in connection with the regular class-work. Frequent reviews and examinations are given in all classes in history.

General History.—The public conception of what constitutes history has greatly broadened during the past century. In the former

days of teaching, the details of battles, the intrigues of courts and kings, were the chief considerations. Now the thoughts and actions of the people ar deemed more important; the social, economical, and ethical elements of human life and progress attract the careful attention of teachers of history. The course in General History embraces two terms' study of the subject, in which the origin, development, and growth of countries and their institutions are carefully considered. Special attention is given to the great characters in history—creators of events. The leading elements of historical development, such as reformations, important movements for advancement of nations, the germination of modern institutions, and the transitions to more liberal forms of government are each and all dwelt upon in their varying relations. The text in use is supplemented by stories from authentic sources, while the students are directed to the library for further material and information.

English History.—This branch, with Ethics and Logic, may be substituted for the Latin of the Senior year. During the term the Seniors study the geography, development, and advancement of England as shown in history. Attention is directed to the great changes in the political and religious character of the country. Among the topics emphasized particularly are its revolutions, literature, institutions, lines of rulers, influence upon other nations, and the commercial and industrial relations with the world at large.

Geography.—The subject of Political Geography is carefully taught as presented in modern text-books, with abundant help in the form of maps, globes, and illustrations. Facts and causal relations discovered in the study of home surroundings prepare for the study of distant and unseen natural features, resources, industries, commerce, modes of communication, and unfamiliar peoples. Students who expect to enter the Junior class are urged to prepare thoroughly upon this branch before entrance upon normal work. A thorough course in Physical Geography is given. Geological agencies now operative are first studied; the forces producing changes, and the laws of their operation are considered; also the structure and development of the earth and its adaptation to the support of life are traced. The development of the nation is considered with reference to its dependence upon climate and general geographic conditions. Modeling in chalk, sand, and paper-pulp is taught.

Civil Government.—The demand upon public schools to-day is a systematic training for citizenship. To talk about patriotism is not enough; the highest ideals of citizenship must be made a part of the school course, not alone in the highest schools of the land, but in the grammar schools and in the little schoolhouse on the country road as well. In accordance with this idea, the students of the Junior year make a careful study of the Civil Government of the United States and of the State of Pennsylvania. The work prepares the students not only

to teach this important subject, now required in the public schools of the State, but to perform in a better manner their duties as citizens. They must be led to the discipline and practice of good citizenship through the understanding of the spirit of the same. The facts of the Constitution and such comments as are found in ordinary texts are carefully studied, and supplemented with much additional information and practical application.

DRAWING AND MANUAL TRAINING

Drawing.—The subject of Form Study and Drawing receives the attention which its importance demands. As a knowledge of drawing is required of every teacher, it is the aim to give students a knowledge of fundamental principles; to emphasize the industrial and the æsthetic values of the subject; and to develop the appreciation, creative ability, and individuality of the students. During the Junior year, outline-drawings from models, objects, and nature are made. Then follow studies in light and shade; simple landscape compositions in pencil, ink-wash, and color; water-color work from nature; simple decorative designs; illustrative work; freehand and mechanical working-drawings and patterns.

Paper Folding.—A study of the square and equilateral triangle is made the basis for work in paper-folding and cutting. This serves as an introduction to the elementary work in language, form-study, manual training, and the kindergarten. The construction of simple forms and objects in paper is here introduced.

Basketry.—The work in Basketry includes both reed and raffia baskets. The simpler forms of basketry are first made from dictation, in order that the students may learn the different weaves and stitches. Then the students are encouraged to work out original forms of baskets for special purposes. A great variety of basket forms is the result. Two points are strongly insisted upon in the designing of the baskets: adaptability to the purpose for which the basket is intended; and beauty in form, decoration, and color. A study of Indian basketry is made in order to secure suggestions for designs. The work affords abundant opportunity for the expression of individual thought.

Whittling and Chip-Carving.—The contribution of manual training to a complete and rounded education is now generally recognized. We do not attempt to prepare special teachers in this subject, but rather to give the ordinary teacher an equipment that will enable him to make a beginning in connection with other school work. In addition to the basketry mentioned above, the members of the Middle class are given a course in Whittling and Carving—a line of work that is fascinating to both pupil and teacher. This includes: Construction and decoration of objects whittled from thin wood; making of objects requiring simple joining; original designs for carving; decorating of boxes.

Color and Modeling.—During the Senior year a special study of

color is made by means of colored papers. Abundant practice is given in matching, naming, comparing, and combining colors; observation of color in nature; study of the principles and methods for teaching color.

Considerable attention is given to the modeling of natural forms in clay and other media. Other forms of manual training occur in connection with the work of map-modeling in geography and history.

Picture Study.—In connection with the advanced work in drawing and painting a brief study is made of ancient, medieval, and modern art, with the intention of leading the student to see that art is an expression of the life of a people. Some study is made of the motifs and beauties of masterpieces of art.

SCHOOL ARTS

Penmanship.—Full opportunities are provided for the acquisition of a good style of penmanship. The essentials of good business writing are legibility and speed. These are secured by the use of the approved system of Medial Writing at present employed in the school. Economy of effort is the basis for determining all the details of form, position, movement, and aims of practice. Penmanship is considered only as a means to an end.

Bookkeeping.—The normal course requires a knowledge of single-entry Bookkeeping only, with a knowledge of common business papers. The work given under this branch is such as will prepare the students to teach the subject, and to make use of it in the illustration of many of the phases of commercial arithmetic. Habits of neatness, accuracy, and thoroughness of work are cultivated. Students are made familiar with practical business problems, and prepared for the undertaking of business life. The course in double-entry bookkeeping is provided for those who wish to secure more complete business training, and most of the students avail themselves of the advantage offered. Every person who keeps accounts should have a knowledge of the principles of double-entry bookkeeping.

Vocal Music.—A period of each day during the spring term is given to instructing students in the elementary principles of vocal music. The subject is considered from the teacher's point of view in order that students may learn how to teach music in the public schools. A large chorus-class, open to all, is organized each term for the purpose of practice in singing at sight, and for enjoying the works of the masters of music.

Drawing.—The work in this class is outlined above in connection with manual training. The subject is presented in such manner as to lead the student to seek the culture that is derived from the beautiful in nature and art. An outline, graded and adapted to the primary and grammar grades, is planned, and instruction in methods of presentation is given.

ELOCUTION

Oratorical Training.—The work of Elocution and Oratory aims at the highest cultivation and development of the human voice. The student is led to comprehend, to appreciate, and to communicate thought in the most natural and effective manner. Every effort is made to develop the individual power in each pupil, and to give him a knowledge of the natural laws of expression. The object sought is not mere imitation; but each pupil must think for himself, and learn to appreciate and love good literature. Much stress is laid upon voice-drill by means of exercise in pitch, quality, inflection, articulation, enunciation, tone-color, word-painting, cadence, rythm, and melody. Physical expression is developed by breathing exercises, bodily movements, gestures, attitudes, and pantomimes. Public recitals are given from time to time, and the literary societies and entertainments afford opportunities for practice before audiences. Special arrangements may be made for private lessons on these subjects.

PHYSICAL EDUCATION

Physical Training.—The work in Physical Education is organized not only for the purpose of controlling all athletics and gymnastics, but of giving to each student, regardless of physique or athletic ability, some form of physical exercise in which he may safely indulge with profit.

The supervision and general control of this department is under the director of Physical Education advised by the Principal and Board of Trustees. It supervises all training and coaching of teams, arranges all schedules, and has general charge of all athletic contests on the athletic field, tennis courts, and athletic and gymnastic equipment.

The gymnastic work is divided into corrective and hygienic body-building exercises, recreative contests, and heavy apparatus work for development, co-ordination, and objective control.

Those who are physically unable to take up the regular class work may take the corrective and medical gymnastic work, and thus condition themselves for the graded class work.

Interest is aroused in all forms of physical activities: such as fencing, rythmic gymnastics, tennis, and field hockey; and thus many students may become devotees of some particular game or sport long after graduation.

At the close of the spring term a demonstration of many phases of the gymnastic work is given, in order to show the degree of development attained and the sanity of pursuing some physical activity in connection with school work.

All male students are required to undergo a thorough physical examination before entering any class in physical training or participating in any athletic contest.

KINDERGARTEN

Kindergarten Training.—A Kindergarten, under the direction of a teacher of rare attainments and qualifications, is established in connection with the practice-school of the institution. The object of this branch of the training department is to afford the pupil-teachers an opportunity to observe the characteristics of little children, and to gain some working knowledge of kindergarten methods. Our students derive great benefit from this work, and are led to realize the value of the kindergarten in introducing a proper spirit into the primary schools of the country. In this department Seniors and Graduates may learn, through teaching and observation, the proper handling of the gifts and occupations, and the successful utilization of the play instinct of children. The advantages of this work, especially to primary teachers, cannot easily be over-estimated. The success of this department during the past years has been such as to prove its great value to our outgoing teachers, and strong efforts are put forth to increase its effectiveness each year. The practical kindergarten in operation is worth many talks about the method of operation and the spirit of the instruction. This department is recommended to all students who expect to become primary teachers.

DEPARTMENT OF MUSIC

The teachers in charge of this department are fine musicians, and have had long and successful experience in their profession. Our equipment is most ample, and it is purposed to keep up the best grade of work in every respect. The methods sanctioned by experience and the best musical authorities are followed. Full facilities for pursuing the study of either instrumental or vocal music are provided. A thorough knowledge of the piano is obtained through a study of the works of eminent composers, particular attention being paid to style and expression. Careful instruction is given in voice culture, and the excellence of the work done is attested by the marked growth of the department. Class instruction is made a strong feature. Instruction in the elements of vocal music is imparted to our students in the Junior class. The general work includes sight-reading, and the proper management of the voice. Diplomas or testimonials of efficiency are granted on the completion of the special courses in music.

Our instruments are all examined at regular intervals by an expert, and are thus kept perfectly in tune. Musicians will readily appreciate the importance of this fact.

The time for the completion of the courses in music will depend entirely on the qualifications of the student on entry, and on his ability and application. Before completing the course, students must have had two years' work in Theory, Harmony, Counterpoint, Analysis, and History.

Special stress is laid on sight-reading and memorizing in each grade. Recitals are given throughout the year, when students sufficiently advanced are given opportunity for public performances. A course of reading in musical literature is commended to cultivate the style and enrich the pupil's knowledge of the great masters.

PIANO COURSE

Preparatory Class. — Hand Culture; preliminary exercises of the Leschetitzky method; New England Conservatory Course, Grades I & II; Gurlitt, Op. 117; Biehl, Op. 44; Burgmuller, Op. 100; Loeschorn, Lecouppy, Kohler.

First Year.—Hand development; technic; Czerny, Op. 299; Kullak Octave Studies, Pt. I; Bach's Little Preludes and Fugues; Sonatas, Haydn, Mozart; pieces suitable to the grade.

Second Year.—Advanced technics; Czerny, Op. 740; Cramer, Bach two and three part inventions; Kullak Octaves, Part II; Sonatas by Mozart, Beethoven; Pieces by Schumann, Schubert, Grieg, Chopin, and American composers.

Third Year.—Clementi's Gradus (Tausig); Bach's Well-Tempered Clavichord; Chopin; Beethoven; Schumann; concertos, repertoire.

Piano Normal Class.—The Piano Normal Class serves a two-fold purpose, in providing a practical training in the art of teaching, and in enabling a very large number of young people to acquire at a nominal expense the rudiments of a musical education, sufficient to fit them to enter the regular course of the school.

Students who have reached the advanced grades in Pianoforte and who are candidates for certificate, are required to teach in the Normal Department, and at the same time to pursue the course in methods and practice of teaching one or more school years. This department is under the supervision of the musical Faculty.

The classes of pupils in the Normal Department are composed of beginners under sixteen years of age. Public demonstrations of the work in this department will be given from time to time.

VIOLIN COURSE

Violin.—This course gives to the individual pupils, in the simplest and most direct way, instruction in the use of the violin. The special

work will be made as helpful as possible to each pupil. This instruction has been placed in charge of a first-class teacher.

Guitar.—Pupils pay at the same rate per lesson for instruction in the use of the guitar and other stringed instruments as for lessons in the piano course.

Mandolin.—Private lessons will be given in the use of the mandolin, and no pains will be spared to make this instruction pleasurable to the student.

VOCAL COURSE

Voice Culture.—Voices are educated and trained strictly in accordance with the methods employed in the Italian school of vocal culture, in which special attention is given to the use of the breath, placing of tones, exercises for flexibility, and all that pertains to artistic solo singing. This work is under the direction of a teacher of large experience, one who has attained great success in the larger cities of the country and at the Chautauqua Assembly.

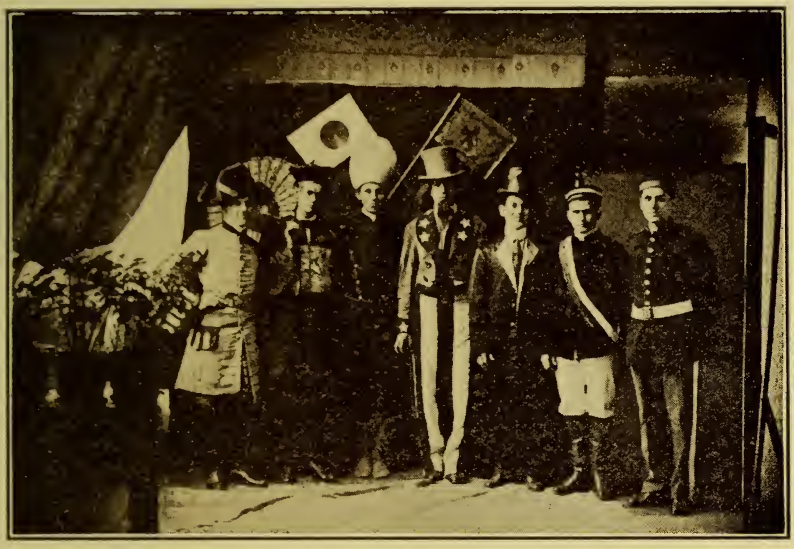
Chorus Class.—A large chorus, free to all students, is organized each term for the purpose of studying the music of the great composers, ancient and modern. This affords excellent opportunity for gaining a wider knowledge of musicians and musical compositions.

Sight Reading.—A class in sight-reading meets every school day during the Spring term. All Juniors are required to attend this class, which is for the purpose of instructing the students in the proper management of the voice, the theory of vocal music, the best way of presenting and teaching the subject of music to the pupils in the public schools.

TEXT-BOOKS

All the text-books used in the Normal department of this institution are furnished without charge. The student will be required to replace any book lost, torn, marked, or otherwise defaced. The books in use are:

Readers. — Brumbaugh, Clarke; **Orthography.** — Rice, Sheldon; **Arithmetic.**—Heath's New Arithmetic, Milne, Wentworth, Hamilton; **Algebra.** — Hull; **Geography.** — Tarr and McMurry, Roddy, Morton, Tarbell; **Physical Geography.**—Dryer; **History U. S.**—McMaster, Mace, Morris, Eggleston; **Physiology.**—Davison; **Botany.**—Andrews; **Civics.** — Maltby; **School .Management.** — Raub; **Paper-Folding.** —Frœbell's Square, Maltby; **Map Modeling.**—Maltby; **Drawing.**— Prang; **Vocal Music.**—Leason; **Writing.**—Medial; **Grammar.**—Patterson; **Bookkeeping.** — Williams and Roger; **Methods.** — Maltby, White; **Latin.**—Allen and Greenough, Collar and Daniell, Lowe and Ewing's Cæsar; Allen and Greenough's Texts; **Greek.** — Goodwin's Grammar, Goodwin and White's Anabasis; **Rhetoric.**—Herrick and



SONG TOURNAMENT

Damon; **Pedagogy.**—White, Compayre; **Zoölogy.**—Jordan and Kellogg; **Geology.**—LeConte; **Chemistry.**—Dennis and Clarke; **Geometry.**—Milne; **General History.**—Myers; **Psychology.**—Halleck; **Physics.**—Carhart and Chute; **Trigonometry and Surveying.**—Wentworth; **Astronomy.** — Young; **English Literature.** — Halleck, Newcomer; **French.**—Fraser and Squair, Muzzarelli, Guerber, Malot, Labiche, Sand, and various texts; **German.** — Joynes-Meissner, Seidel, Zschokke, Guerber, Sturm, and various texts; **Physical Training.**—Nissen, Preece; **Basketry**—White, James; **Nature Study.**—Jackman, Maltby.

Slippery Rock State Normal School

LOCATION

Slippery Rock State Normal School is situated midway between Pittsburg and Erie, in Butler county, about 17 miles from Butler, Mercer, and New Castle, and is easily accessible from all points in Western Pennsylvania. Those coming from Pittsburg can reach the school by the B. & O. and the B. & L. E. railroads, which run morning and evening trains to Kiester Station, three miles distant, or may take the West Penn R. R. to Butler, then the B. & L. E. to Kiester. Those coming by way of New Castle may change cars at Mercer and come to the same station; but may also take P. R. R. from New Castle to Redmond, changing at Leesburg. At Shenango, the B. & L. E. R. R. connects with the Erie R. R., and at Osgood with the Lake Shore R. R., thus affording easy access from the north.

The location of the school is pleasant and healthful. Being situated on a hill, a commanding view of the town and surrounding country is afforded, and it possesses unexcelled facilities for healthful drainage.

There are three churches in the town—the Presbyterian, the United Presbyterian, and the Methodist Episcopal, at which the students are always welcome—and it is surrounded by a community noted for morality and intelligence.

HISTORY

During the autumn of 1887, the question of organizing a school in the town was agitated. The project found many friends and soon assumed definite form. A meeting was called at which it was determined to erect a building and open an academy. Subscription papers were prepared, and the community was canvassed for money to erect a building and sup-

port a school until it should become self-sustaining. While this work was in progress, the discovery was made that there was no normal school in this district. A second meeting was called, at which it was resolved to erect the necessary buildings and apply for recognition as the State Normal School of the Eleventh District. To determine was, with them, to act. Subscriptions were again solicited, and soon sufficient money was pledged to warrant success.

In the spring of 1888, an organization was effected, a charter obtained, a building committee elected, and the erection of the buildings was begun. All lent ready aid, and through the summer and succeeding winter, work was carried on with vigor.

In the spring of 1889 the buildings were completed, and on the first day of February the committee appointed by the State inspected them. By a unanimous vote the recognition of the school was recommended.

BUILDINGS

There are six principal buildings—two dormitories, a chapel, a main building, a gymnasium, and a model school. They are situated on a commanding eminence. The dormitories contain 220 rooms, besides a reception-room, large dining-hall, kitchen, store rooms, etc. The chapel is situated between the two dormitories. It is a fine stone building, 89 x 110 feet, Norman-French architecture, and contains music rooms and the general assembly room. The large room has a seating capacity for one thousand persons, and a gallery with three hundred additional seats. The endeavor has been made to construct an auditorium of beauty and convenience. The rooms are all heated by steam and lighted with natural gas. The buildings are supplied with pure, soft water. Every floor is provided with an abundance of hot and cold water, bath rooms, lavatories, and closets of the most approved pattern.

The authorities of the school are determined to do all that can be done to promote the ends for which it was established, and to add to the comfort and convenience of all connected with it. Many improvements have already been made, viz.:

stone walks, bath-rooms and closet annexes, laundry, Smead dry-closets and ventilating system, grading and ornamentation of grounds, and equipment of Model School. The main-building contains class-rooms, reading-rooms, society-halls, library, and offices, and is one of the finest school buildings in the State. The ladies' dormitory forms a beautiful building with a frontage of two hundred and twenty feet. It contains the kitchens, pantries, and a beautiful dining room, capable of seating over four hundred persons. The boys' dormitory is a very commodious and substantial building, one of the best in the State. It is a model of beauty, comfort, and convenience. Few buildings of its class can equal it in those points that make it a real home for young men who attend the school. The Model School building, erected at a cost of $27,000, adds much to our facilities during the school year. Located directly on the campus, the practice-school does not interfere with the work of the regular normal department. The rooms in this building are adapted to separate grades, and Seniors are placed in full charge of the rooms during their practice periods. Since our practice-school is a regular county school, the value of the year's experience thus gained by seniors cannot well be overestimated.

GROUNDS

The buildings are surrounded by grounds comprising about fifty-seven acres. Part of this is covered by forest trees and orchards. The part immediately surrounding the buildings has been graded and laid out in beautiful lawns intersected with pleasant walks and drives. Many trees and shrubs have been planted, and numerous pots of flowers enhance the beauty of the place. A handsome fountain, the memorial gift of a recent class, stands directly in front of the main building. Provision has been made for lawn tennis and other out-door games. A baseball field has been carefully laid out, and a grand stand erected capable of seating over four hundred persons.

ATHLETICS

Athletic sports are encouraged as a means of pleasant recreation, for their value in developing the body, as a source of social and ethical culture, and as cultivating the spirit of coöperative enterprise so essential to individuals throughout life. When athletics are so managed as to cultivate determination, courage, self-reliance, obedience and quickness of decision, there is much to be urged in their favor. Tennis, basket-ball, base-ball, and foot-ball are the games most in use. There are numerous good tennis courts on the campus. The Athletic Field recently laid out is one of the finest grounds in the State for base-ball and foot-ball. It is well-graded, and will soon be placed in sod or sown with lawn-grass. For the other games ample provision will be made. The gymnasium is open for exercise at certain hours, under suitable restrictions, to all who are enrolled as students.

Under the general term of Athletics are included all forms of physical activities of a competitive nature such as track and field sports, foot-ball, base-ball, tennis, field hockey, etc. Teams representing the school as well as the various classes are chosen in all the major sports and are conditioned and trained by the coach and director of Athletics.

Athletics are not confined to boys only, as is the case in so many schools, but the girls are encouraged to participate in all girls' sports and have the advantage of the coaching and direction of the directors.

LIBRARY

The Normal Library is open during every school day, when students are permitted to consult works of reference, or take out works for a limited period. At certain times in each school day, students may secure books for longer periods, limited to two weeks.

Many new books have been added to the library, so that its attractiveness and usefulness have been greatly increased. By a judicious expenditure of funds, we hope to make this important aid to the student more valuable from year to year.

A reading-room containing the leading daily and weekly newspapers, magazines, journals of education, church and Sunday-school weeklies, etc., is also connected with the school, with privileges free to all.

LITERARY SOCIETIES

Among the attractions of the school are two flourishing Literary Societies, conducted by the students—the "Bryant" and the "Philomathean." They hold weekly meetings. Any student may become a member of either of the societies by paying a small initiation fee. The training given in these societies is of such great value that students cannot afford to neglect the opportunities furnished for literary and oratorical culture.

LECTURES

Students should have those opportunities for culture which will enable them to become stronger intellectually through mental contact with the strong minds of the country. Through the hearty coöperation of a generous and public-spirited community, we are able to bring before the students many prominent lecturers.

BIBLE STUDY

The advantages of special study of the Bible are offered to all students who become members of the Rev. Dr. Hamm's Bible-class. The class meets at 4:45 on Sabbath afternoons. The basis of work during the past year has been the East Northfield "Beginners' Course in Bible Study," and the course will be continued during the coming year.

Expenses

Regular Charges. — Tuition and boarding, including heat, light, furnished room, and use of text-books, for the Fall Term of 16 weeks, $76; for the Winter Term of 12 weeks, $57; for the Spring Term of 14 weeks, $67; for any time less than a full term, $4.75 a week.

Tuition without boarding, for the Fall Term, $24; for the Winter Term, $18; for the Spring Term, $21; for less time during any term, $1.50 a week.

Teachers whose terms do not end until after the beginning of the session, are charged by the week, at **term rates,** if they enter as soon as their schools close, and finish the term.

Special Charges.—Boarding, including light, heat, etc., during the vacations, will be $3.75 a week. Transient board will be $4.00 a week; by the day 75 cents.

The Registration fee is two dollars.

The hack hire between Kiester and Slippery Rock is 25c.

Instrumental Music.—The charges for instrumental music, two lessons a week and two practice periods a day, will be for the Fall Term, $18; for the Winter Term, $14; for the Spring Term, $16; for any time less than a term, $1.25 per week.

Vocal Music.—The charges for vocal music are made at the same rates as for instrumental music. A charge of $2.00 is made for the use of the piano for two practice periods per day.

DEDUCTIONS

For absence of two consecutive weeks or more, on account of personal sickness, a reduction of one-half the usual charge for board and tuition will be made.

No reduction is made for absence the first two or last two weeks of the term, except by previous arrangement with the Principal.

No deduction is made for absence the last four weeks of the Spring Term.

ROOMS

Each room is 13 x 15 feet in size, carpeted, and contains double bed, good mattress and springs; wardrobe, washstand, table, and usual room furniture; intended to accommodate two boarders, and the scale of prices above given is arranged accordingly.

All students are to take rooms and board at the institution, unless they reside at home, or have obtained permission from the Principal to board elsewhere.

Students are expected to provide themselves with towels, table napkins, soap, and other needful toilet articles.

Students in actual attendance at the close of one term are entitled to preference in the choice of rooms for the next term. All other students are entitled to choice of rooms in the order of the reception of their applications.

No room selected by students will be held for them beyond the second week of the term, except on special arrangement to that effect.

During the Spring term the School will secure rooms in town for students who are unable to obtain rooms in dormitory. Rates are kept within advertised conditions.

STATE APPROPRIATION TO STUDENTS

In accordance with an act of the Legislature, the following appropriations are made to Normal students:—

1. Each student over seventeen years of age, who shall sign a paper declaring his intention to teach in the common schools of the State, shall receive the sum of **one dollar and fifty cents** per week, or such part thereof as shall actually be paid by the State as aid to undergraduates.

2. Any student, to secure the benefit of these appropriations, must receive regular instruction in the Science and Art of Teaching, in classes devoted to that object, for the whole time for which such allowance is drawn.

STUDENTS' ROOMS

3. In case of a deficiency in the amount appropriated by the Legislature for State Aid to students, each student will receive his proportionate share of the appropriation.

PAYMENT OF BILLS

Bills for board and tuition are payable, the one-half at the opening of the term, and the remainder at the middle of the term.

These payments must be made, or satisfactorily provided for, before students are assigned to classes.

Students leaving school before the end of the term must report to the Principal at the time of leaving.

All bills are payable to the Principal, who acts in behalf of the Trustees.

Government

REGULATIONS FOR STUDENTS

The discipline of the school is made as simple as possible. Self-control is the ideal sought. Students are expected to do without compulsion what is required, and to refrain voluntarily from all improprieties of conduct. The intelligent conception of duty and a quickened conscience will generally result in a cheerful, voluntary obedience. That government is best that seems to govern least.

Nothing less than regular attendance, good behavior, and hearty allegiance to all the interests of the school will be accepted as the conditions of membership.

1. Study-hours will be published at the commencement of each session, and the bell will be rung to give notice of them. Students must devote these hours exclusively to study and recitation.

2. All students are required to be present at all devotional and general exercises in the chapel, unless excused. Attendance on religious services during Sabbath is required.

3. A record of scholarship will be kept, which will be open to inspection by the students and the public.

4. Students are required to take up enough studies to keep them, in the judgmnt of the Principal, sufficiently employed, but not to take up more than they can study with profit.

5. Each student of instrumental music will have regular hours assigned for practice, during which time no spectator can be present to interrupt the exercises or divert the attention.

6. No student may indulge in the use of tobacco in any of its forms in or about the buildings, or of intoxicating drinks.

7. Gentlemen not connected with the school will not be permitted to call upon lady students without permission.

8. Disorderly conduct in the buildings is prohibited. Each student will be held accountable for any disturbance or damage in his room.

9. Students whose sense of honor and propriety cannot be trusted will be summarily dismissed. They will also be sent away whenever, in the opinion of the Faculty, it is evident that they are pursuing a course of conduct detrimental to themselves and the institution.

VISITORS AND VISITING

Calls on students at other times than during the hours of recreation interfere seriously with the object of the school, and are not allowed except in case of necessity. Persons desiring to visit the school are invited to do so at any time.

Every absence from school duty subtracts materially from the progress of the student. Frequent visits home or elsewhere prevent the concentration of thought which true success demands. Parents are earnestly requested not to take their children away from school duties unless it is absolutely necessary. Students are not permitted to visit home or away from town without special permission from the Principal.

APPLICATIONS FOR TEACHERS

School directors and principals often apply to us for teachers. We are always pleased to answer such requests by furnishing good teachers, but we are better able to do so near the close of each school year than at any other time. While the school aids its graduates to secure positions, it makes no promises to do so. It may be said, however, that for several years we have been unable to supply the demand made upon us for graduates to fill positions in various grades of schools. Persons desiring to secure our graduates should therefore apply early. Great care is exercised by the Principal in recommending graduates for positions.

It must not be supposed that all persons who attend our school for one or more terms are good teachers. The graduates of the school are almost invariably successful instructors

and disciplinarians. Persons desiring to employ students as agents should make application to the Principal. Permission will not be granted to any one to visit students in their rooms for the purpose of employing or instructing them as agents.

MAIL, TELEPHONE, EXPRESS

The school has two mails daily. Mail matter should be addressed: **Slippery Rock, Butler County, Pa.** The words **State Normal School** on the envelope of a letter or package will aid its delivery, and may prevent it from being sent to the wrong postoffice.

The school is connected by telephone with nearly all parts of Western and Central Pennsylvania.

Express packages should be addressed: **State Normal School, Slippery Rock, Pa.**

For further information address the Principal of the school.

Alumni Register

(This Register gives the present address of each graduate so far as known. Errors should be reported for correction.)

CLASS OF 1890

Dale, Mary A. (Mrs. L. R. Wylie), Lisbon, O.
Elliott, Virginia H., Lang—Teacher.
Irwin, Carrie I (Mrs. W. J. McKim), Ellwood City.
Locke, Annette P., Skidmore—Teacher Edgewood Public Schools.
McCalmont, Frances (Mrs. R. A. Pringle), Tiona.
McClymonds, Inis F., Slippery Rock—Teacher in State Normal School.
McJunkin, Elizabeth, Elora—Teacher.
Morrison, Anna T. (Mrs. John C. Lincoln), St. Benedict.
Patterson, Elizabeth—Died December 2, 1905.
Richardson, Alice (Mrs. A. E. Abel), 409 Warren Ave., Chicago, Ill.
Thornburg, Blanche (Cameron)—Died November 9, 1906.

CLASS OF 1891

Allen, Robert G., New Castle—Business.
Cheeseman, S. L., Slippery Rock—Merchant.
Heginbotham, Ida V., Saxonburg—Teacher.
Hill, Jennie L. (Mrs. J. Wilson White), 55 16th St., Wheeling, W. V.
Lawrence, Charles W., Los Angeles, Cal.—Professor in University of Southern California.
Locke, Elizabeth N., Harlansburg, Pa.—Teacher in Duquesne.
McCarnes, Mabel F., Slippery Rock—Librarian State Normal School.
Miller, Harriet M., Bayard St., E. E., Pittsburg.
Munnell, Howard, New Castle—Business.
Ralston, W. A., Slippery Rock—Lawyer.
Robinson, Jennie G., 942 North Ave., West, Allegheny—Bookkeeper.
Wilson, Ada M., Slippery Rock—Teacher in Thurston School.

CLASS OF 1892

Anderson, Madge F. (Mrs. J. L. Biggerstaff), New Castle.
Anderson, Martha M. (Mrs. W. S. Chatley), New Galilee.
Armstrong, Cora M. (Mrs. D. J. Brown), 1 Thomas Ave., Bellevue.
Bean, Ida M., Wilkinsburg—Teacher in 37th ward, Pittsburg.
Boyce, Alberta (Mrs. H. G. Dunn), Gastonville.
Christley, John, Pittsburg—R. R. Postal Clerk.
Christy, John H.—Died January 27, 1907.

Cowden, John V., Butler—Physician.
Crawford, Jean B., Allegheny—Teacher in 5th ward.
Dieffenbacher, Vallie (Mrs. William H. Packer), Homestead.
Dumm, F. A., Bellaire, Ohio—Minister.
Gibson, Evangelyn—Died January 12, 1894.
Gilmore, Jennie V. (Mrs. Stanley Wilson), Kecksburg.
Glenn, Frederick T., Plain Grove—Farmer.
Hare, Mary T. (Mrs. Wm. H. Whitten), Oakland Cal.
Kerr, Louella (Mrs. Rowland Cuppett), Rochester.
Kerr, Margaret (Mrs. Frank Herr), Aspinwall.
Locke, Anna L., Harlansburg—Teacher.
McDonald, W. M., Allegheny—Principal Seventh ward Public Schools.
McKnight, Lillie J., Beaver Falls—Teacher.
McLaughlin, Michael L., McLaughlin Real Estate Company, 178 Remsen St., Brooklyn, N. Y.
McNees, Mary F., Slippery Rock—Teacher in Aspinwall High School.
Miller, Carrie A., Monterey St., Allegheny.
Miller, M. J., Geneva—Principal Public Schools, New Castle.
Moore, W. E., Pittsburg—Business.
Morrow, Anna J. (Mrs. J. F. McNaul), Wilkinsburg.
Say, Sarah E., Jefferson Center—Teacher.
Smith, Kate P. (Mrs. H. A. Cross), Ashley, W. Va.
Travis, Vanetta J., Avenue—Principal Brackenridge Schools.
Weller, Martha G. (Mrs. M. J. Eakin), East Liverpool, O.
Williams, Della B., 43 E. Orchard avenue, Bellevue—Teacher.
Young, George C., Jacksville—Business.
Turner, Annette (Music) (Mrs. Annette Jordan), Harlansburg.

CLASS OF 1893

Amberson, Margery M. (Mrs. Robert Baldridge), McKeesport.
Armstrong, Kate R., Slippery Rock—Teacher in Youngstown, O.
Bailey, Ella J., Jamestown—Teacher in Sharpsville Schools.
Baxter, Newton J., Jeannette—Dentist.
Brown, Frank P.—Died November 22, 1896.
Canon, Harland L., Fredonia—Druggist.
Chambers, Harriet, New Cumberland, W. Va.—Teacher.
Chambers, Margaret, Spring Church—Teacher.
Chambers, Nancy Jane—Died January 30, 1905.
Christley, Tirza F. (Magee)—Died May 19, 1908.
Clay, Ida A. (Mrs. R. H. Jamison), Foxburg.
Davison, Robert E., 632 Fulton Building, Pittsburg—Physician.
Dugan, Belle, Harrisville—Teacher in Tarentum.
Fox, Anna G. (Mrs. Albert McCullough).
Francis, Harriette—Deceased, 1897.
Garver, Bertha A., 271 North Franklin St., Washington—Teacher in 5th ward.

Gill, Sallie (Mrs. J. N. Brenneman), Ellwood City.
Gilmore, Flora A. (Mrs. Henry Gallagher)), Wilkinsburg.
Gordon, Carrie (Mrs. W. H. Pinkerton), Lakota, North Dakota.
Gosline, Charlotte (Mrs. Marion F. Gamp), Randolph, N. Y.
Hay, Alice C. (Mrs. A. Kenna), New Brighton.
Hilliard, W. R., 501 Sheridan avenue, Pittsburg—Printer.
Hoerr, Katherine E., 270 Fiske street, Pittsburg—Teacher.
Hoon, Mary (Wasson)—Died March 11, 1908.
Hunter, Anna S. (Mrs. Anna S. Buvinger), 830 Euclid avenue, Pittsburg.
Jack, Laura (Mrs. Laura Stewart), Boyers.
Kerr, Charles W., Tulsa, Oklahoma—Minister.
McAdoo, Florence E. (Mrs. Horace Durbin), New Kensington.
McClure, Edna Arbella (Mrs. Paul C. Briggs), Fulton, Cal.
McElheny, H. Claire, Greenville—Teacher in Braddock.
McGarvey, Samuel C., Bridgeville—Physician.
McKee, Mary H., 806 Negley avenue, Pittsburg—Teacher in 19th ward.
Mawhinney, Maude, Utica—Teacher in Homestead.
Maynard, Viola B., E. Springfield—Teacher in Moorestown, N. J.
Miller, Frank F., Syracuse, N. Y.—Civil Engineer with Semit-Salvay Co.
